NEW PRODUCT THE CARD CASE

The Tiger range is now enriched with new products keeping the same goal: a unique quality.

Why the card case?

A genuine solution for our customers.

Many of us are familiar with this waste of time: we always have to take out our card of our wallet or case when proceeding to checkout or going in the borders of transport. Today, the classic card cases are convenient, but they do not have the wireless function if they are left in their case. The muvit card case provides a unique feature in the market which makes easier user's life. This means less handling during transit or contactless payments.

Design, A clear packaging

We have worked the delicacy and the convenience of the solution at the meantime. The design is sophisticated and the packaging insightful. The process time is reduced by 8 times (2 seconds with 16 on average).

The Card Case

The first compatible contactless case: Confirm your travel tickets and pay faster worry-free!

Highlights :

- Rubber touch case
 - Folio with a tab for an easy-opening
 - Ultra-functional: « contactless » compatible card storage when the folio is open
- Colors: black and grey

INNOVATION OUR PACKAGING

We are developing our packaging for a better user experience.

What is changing in 2018?

A new packaging !

We are committed to provide you the best-selling experience. Therefore, we got back to the bulk and the two information that the customer is looking for on the shelves :
"Does this protection suit for my phone ? How is the product ? "

This new packaging is :

- The perceived quality at first sight
- A product which does not get worse on shelf
- The main: an immediate exposure of the compatibility
- A better product visibility
